

When You're in a Tight Spot, You Can Count on Gastec.

BETTER TECHNOLOGY

Gastec's Automatic Counter Eliminates Miscounted Pump Strokes

The new Gastec Gas Sampling Pump GV-110 includes a built-in counter for tracking up to 10 pump strokes. Although over 85% of Gastec detector tubes require only 1 or 2 pump strokes, the automatic counter eliminates the risk of miscounting when using tubes that require additional strokes.

Manufactured in ISO-9001 certified facilities, the rugged pump is pre-calibrated and includes a lifetime warranty.

Gastec's One-Hand Adapter Lets You Sample Gases with the Push of a Button

Gastec's One-Hand Adapter converts the Gastec Gas Sampling Pump from one-stroke piston action to one-button operation. One-button/one-hand operation makes it perfect for sampling in awkward or hard-to-reach places, in confined spaces, or while standing on a ladder.

Gastec's complete line of pump accessories includes a telescoping extension pole, a hot probe, and 5-meter and 10-meter extension hoses.

Gastec pumps, accessories, and detector tubes are designed, manufactured, and calibrated to work together, so you can count on accurate measurements.

GAS DETECTION

ON-THE-SPOT AMBIENT TEMPERATURE DISPLAY

Increases safety and reduces risk by enabling you to accurately correct for temperature changes on-the-spot.

AUTOMATIC STROKE COUNTER

Tracks up to 10 pump strokes automatically so there is no chance of miscounting.

FLOW FINISH INDICATOR

Ensures precise sample volumes by displaying when a 50 ml or 100 ml stroke is complete.

ONE-HAND ADAPTER

Enables you to operate the pump with the push of a button, freeing you to reach into tight spaces with one hand or hold onto a ladder.

TUBE TIP BREAKER

Has a diamond cutting edge for maximum durability. Discarded tips are deposited in a storage bin for safe and easy disposal.

Gastec tubes and pumps are manufactured by Gastec Corporation. Nextteq is Gastec's exclusive U.S. master wholesale distributor.
