

■ Storage and disposal of Gastec detector tubes

As detector tubes contain sensitive reagents that are ready to react, and some reagents might be corrosive, care should be taken for their storage and disposal.

● Storage of detector tubes

To keep the high quality of Gastec detector tubes, it is necessary to store them in a cool (0 to 10°C (32 to 50°F)), dark place (never expose them to the direct sunlight). Never store tubes above normal room temperature. Keep them in a safe place and out of reach of children.

● Disposal of detector tubes

Used or date-expired detector tubes should be disposed properly in accordance with your local regulations. For further information, consult your Gastec representative.
